

Fire Safety Reporting

Our building's owner, L&M, was recently slapped with 4 dangerous fire safety violations by FDNY.

In order to insure proper repairs and ongoing adherence to the safety regulations that protect our families and our homes, The Roosevelt Landings Residents Association has created a Fire Safety Reporting Log that is quick and easy for residents to use. We will be sharing the information with all the necessary City and State agencies. In order to report, log onto our site at:

<http://rlra.notion.site>

While you're there, please sign up for our [email notifications](#) and [WhatsApp Chat](#) to stay up to date on all building-wide issues.

Please note any of the following problems on our log and **report them to 311**. If you see any further fire safety issues, by all means list them as well.

- Blocked exits or stairwells
- Fire doors that do not close
- Fire alarm problems either in common spaces or your apartment
- Combustible materials in hallways
- Obstructions that could slow emergency evacuation
- Sparks, smoke, burning odors, or flames, either in your apartment or common spaces
- Gas odors
